

“ 3G Mobile Router for UMTS & HSDPA Networks ”

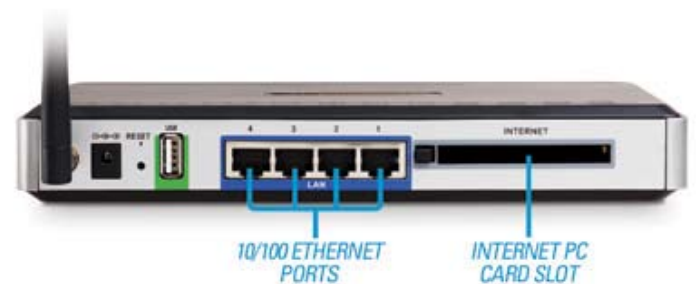

DIR-451

WIRELESS NETWORKING ON-THE-GO

The D-Link 3G Mobile Router DIR-451 answers mobile users' need for setting up a wireless network on-the-go to share an Internet connection.

The 3G Mobile Router DIR-451 enables users to quickly create a secure wireless 802.11g (108G) network and provide access to the Internet using a cellular signal*. By connecting an UMTS, or HSDPA Internet PC card to the 3G Mobile Router, an Internet connection can be accessed and shared virtually anywhere within a wireless broadband network*.
